

Appraisals Rietdijk B.V.

Auctions

We organize bi-annual stamp and coin auctions. To this end, we are constantly looking for material that can be placed in these auctions. The valuations are merely a means of collecting material for our auctions. We value at market or auction value and, if desired, also at insurance or replacement value.

Appraisals at our office

When the collection is assessed at our office, the valuation is without obligation and free of charge. This is possible from Monday to Friday between 9 am and 5 pm by appointment. If you take the trouble to present the collection to us, we will take the trouble to assess it free of charge. If a valuation report is required, the valuation rates below apply as if the collection had been valued on location.

Valuations at your home or elsewhere on location

In principle, home appraisals are possible for collections with an expected realizable value of at least € 3,000,-. The appraiser will consult with you before coming to you to assess whether this is possible. Valuations at your location are possible from Monday to Friday between 9 a.m. and 5 p.m. Long distance valuations are agreed upon before travel. Costs then are often shared between the auctioneer and consigner(s), this is of course only possible for optional very large and/or valuable collections.

Appraisal rates

€ 125,- per hour excluding VAT (21%) travel costs 21 cents per kilometer, The Hague vice versa.

Always with a minimum of € 200 plus VAT (21%) and travel costs at 21 cents per kilometer.

No valuation costs when consigned for auction: When the (entire) appraised collection is presented for auction by Rietdijk, the valuation costs (excl. VAT and travel costs) will be credited. This will then be refunded with the settlement of the auction consignment.

If you decide to hand in for auction during the valuation moment, we will of course not make a valuation invoice. We then cover the costs of the valuation with the auction commission.

Auction rates

If you decide to submit material for our upcoming auctions, we will charge you an auction commission, which depends on the value and complexity of the entry. All this, of course, always in consultation between the sender and the appraiser. **Attention: Auction commission is always in consultation between consigner and auctioneer and always depending the value of your consignment and the amount of work needed.**
